360° ANTI-LEAK DOUBLE BACKWASH SYSTEM

Experience peak performance with Intact's 360° Anti- Leak Double Backwash Technology — a powerful cleaning system that flushes from both the top and bottom of the filter. This dual-directional rinse ensures a deeper, more thorough clean, effectively removing trapped sediments and impurities that single-direction backwash systems often miss. The result? Longer-lasting filters, consistently high water quality, and peace of mind knowing your system is performing at its best — day after day.

0.01 MICRON FILTRATION

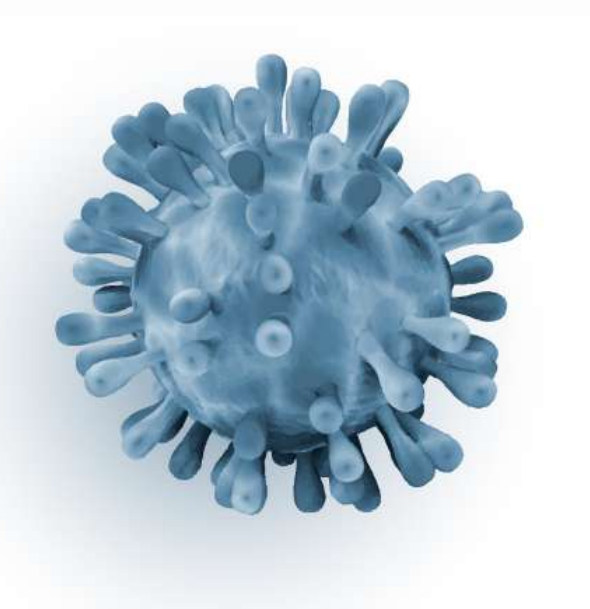
POWERFUL PROTECTION AGAINST



BACTERIA

0.02 - 0.35 MICRON

Unfiltered water can carry harmful bacteria. Even through skin contact or during food washing, these bacteria may cause infections, stomach discomfort, or respiratory illnesses—especially in children and the elderly.

FINE IMPURITIES

0.02 - 0.09 MICRON

Fine impurities (colloids) can cause can make water appear cloudy and irritate the skin.Prolonged exposure skin dryness, and irritation, especially for children or those with sensitive skin.

ORGANIC MATTERS

0.03 - 3 MICRON

Decayed leaves, algae, and microorganisms in unfiltered water can feed bacteria, leading to cloudy water, bad odors, and increased risk of spreading bacteria during cleaning or food prep.

DECAY MATTERS

0.22 - 4 MICRON

Rotting plants or dead organisms in water can cause unpleasant smells, skin discomfort, and promote mold or bacteria growth—lowering hygiene in daily use.
