0.01 MICRON FILTRATION

POWERFUL PROTECTION AGAINST

BACTERIA

0.1 - 10 MICRON

Untreated water can carry harmful bacteria. Even through skin contact or during food washing, these bacteria may cause infections, digestive issues, or respiratory diseases—especially in children and the elderly.

FINE IMPURITIES

0.001 - 1 MICRON

Fine impurities suspended, can cause can cause water appear cloudy and irritate the skin. Prolonged exposure can also contribute, especially for children or those with sensitive skin.

ORGANIC MATTERS

0.1 - 10 MICRON

Decayed leaves, algae, and microorganisms in unfiltered water can feed bacteria, leading to cloudy water, bad odors, and increased risk of waterborne illnesses growing in food prep.

DECAY MATTERS

0.1 - 10 MICRON

Rotting plants or dead organisms in water can cause unpleasant smells, skin discomfort, and long-term health risks. Over time, organic matter can promote harmful bacteria growth, creating hygiene in daily use.
